Eyercize

Online spead reading training

Problemstellung:

Jeden Tag lesen wir unsäglich viele Texte und behalten dabei jedoch die Lesegeschwindigkeit, die wir schon mit 16 Jahren hatten. Wie können wir diese Geschwindigkeit erhöhen und somit Zeit beim Lesen sparen?

Zielsetzung:

Ein Programm, dass uns dabei unterstüzt und zeigt wie man seine Lesegeschwindigkeit erhöhen kann.

Methode:

Eyercize umfasst ein nützliches Tool, das mit Hilfe von Hervorheben einzelner Textteile einen dabei unterstützt, sich der eingestellten Geschwindigkeit anzupassen und somit Schritt für Schritt seine eigene Lesegeschwindigkeit zu erhöhen. Man kann es als Lesezeichen speichern und somit jeden beliebigen Text einfügen und trainieren.

Read Faster and Save Time

The goal of Eyercize is to help you become an accomplished speed reader.

By using Eyercize you will:

- ease your workload
- reduce eyestrain
- improve your job skills
- get better grades
- improve your material retention

Since talk is cheap let's get started and test drive our reading pacer.

[Speed read this introduction](#) or Speed read a book from our [library](#)

Links der Empfangstext den man auch mit eyercize probelesen kann, sowie die Bibliothek mit kostenlos bereitgestellten Büchern, um das Lesen zu trainiern.

Reading is that one activity that we do every day but we don't really practice. Most people learn the basics of reading in kindergarten and never graduate to the next levels.

You are probably using the same basic rudimental tools and techniques that you learned when you were 6. The average American person reads at an average speed of 180 to 240 words per minute and has done so since he was 16 years old. Does it make sense that we hit our best performance at age 16 and that we don't improve much after that? Keep in mind less than 10% read at 400 words per minute and less than 1% faster than 600.

Have you ever wished you could take one of those costly speed reading courses? The problem with those courses is that you have to keep practicing those techniques until they become second nature. That's the goal of this site.

We are here to keep you focused and to help you improve your speed reading everyday.

Using this tool will help you eliminating sub-vocalization. What is sub-vocalization? Sub-vocalization is that voice that you hear in your head as you're reading this text. In many cases it manifests itself as your vocal chords actually engaging as if you were reading out loud. Regression is also a common reading problem fixed by eyercize. Regression happens when you read the same sentence more than once.

Many people experience this problem where they kinda go into a loop and read the same phrase or paragraph multiple times without noticing it. On the left there are the controls of this neat application. You can increase the speed of the pacer just press the letter "i" on your keyboard. Conversely to decrease the speed you would just press the letter "d". If this text is too small to read you can increase the size with the handy slider on the left. Try different settings, I personally love page mode showing 20 lines at the time.

Read faster and get more things you care about done. In the era of information anxiety it's easy to get overwhelmed. Even if you were just to use only this reading pacer you'll probably learn how to read 2-3 times faster than you do right now. So what are you waiting for, install our bookmarklet on the left and start reading you website faster. Many new things are coming out from eyercize so stay tuned.

About Eyercize

Eyercize is dedicated to all those people that want to read faster but they either don't know how to get better at it or don't have the drive or time to be constantly exercising their skill.

Bookmarklet

To make things easier for you, we created a bookmarklet for you. Just drag this link speed read it and drop it onto your browser's bookmark toolbar.

After done so, whenever you see some article on the internet that you would like to read fast, just highlight the text that you want to read and click on our bookmark. A new page will open with our reading pacer and the text that you selected already pre-filled.

Free Features

Currently the only feature that we have is the Reading pacer. The Reading pacer is a very flexible pacer that can be used as a tachistoscope. In the future Eyercize will offer a tachistoscope dedicated page.

The website will have of a series of FREE features as well paid ones. Feel free to give feedback by sending email to feedback@eyercize.com or by submitting your feedback

Erste Erklärung zur Nutzung von eyercize (beliebigen Text markieren und kopieren um ihn ins Tool einzufügen)

Eyercize Bookmarklet

To make things easier for you, we created a bookmarklet for you.

Just grab this link speed read it and drag and drop it onto your browser's bookmark toolbar.

How does it work

Select (highlight) some text in your web browser and click the "speed read it" bookmark, which will open our Eyercize reading pacer in a new browser window with the text preloaded. Ain't that easy.

New and Improved - 3/19/09 10pm

We just finished improving our bookmarklet! It now plays nice with UTF-8 encoding.

What does that mean?

It means that all those funny accents that are present in romantic languages like Italian, French and so on are being preserved for your reading pleasure. This bookmarklet also performs much faster than the previous one.

Frank J. Tipler verwendete 1981 die hypothetischen Sonden für seine Argumentation gegen die Existenz außerirdischer Zivilisationen: Gäbe es solche Zivilisationen, so hätten sie sich bei dem bekannten, hohen Alter des Universums bereits mittels selbstreplizierender Sonden überall hin ausbreiten können (Tiplers Neuformulierung des Fermi-Paradoxons).[2] Carl Sagan und William Newman hielten dagegen, dass intelligente Zivilisationen vom Bau der Von-Neumann-Sonden Abstand nehmen müssten, um zu verhindern, dass diese Sonden unkontrolliert alle verfügbaren Ressourcen verbrauchen.[3] Freitas ist der Ansicht, dass die von Tipler und insbesondere Sagan angenommene Reproduktionsgeschwindigkeit der Sonden weit übertrieben ist und ihre Schlussfolgerungen unter realistischen Bedingungen nicht gezogen werden können.[4] Dagegen spricht aber: Auch wenn sich eine Von-Neumann-Sonde nur alle 100 Jahre verdoppeln könnte, könnten in 10.000 Jahren 2100 = 1,268·1030 Von-Neumann-Sonden entstehen. In der Science-Fiction Serie Stargate findet sich eine leicht abgewandelte Version dieser Theorie, die Replikatoren.

Comprehension testing

I think it is hard to know if I'm making progress unless I'm tested after on comprehension...maybe you could team up with topicmarks or some tool that automatically summarizes text, and offer a multiple choice test immediately after?

Mobile site, please!

I´d really love it if you could provide a mobile version of the website. I almost always browse in my phone, and well, it would make it easier if I could increase the font size without the text flowing out of the screen width. Pretty please.

FAQ

- [Why when I select 3 words per fixation sometimes I see more, sometimes less?](#)
- [Why some of the lines were uneven with 3 or 4 words on them rather than 20?](#)
- [How can I save my settings (wpm, lines showing, etc)?](#)
- [How can I push my reading speed further?](#)
- [Are there any plans for desktop applications?](#)

Why when I select 3 words per fixation sometimes I see more, sometimes less?

Our algorithm is based on the average length of a word in the English language (5.1 characters). So when you pick 3 words per fixation you might get 4-5 words that are 15 characters long in total and sometimes 2. This is done to maximizing homogeneity in the word chunking.

Why some of the lines were uneven with 3 or 4 words on them rather than 20?

When you submit your text, we try to keep the paragraphs intact for concept separation and to better material comprehension. We believe that the original text was divided in paragraphs by the author for a reason and we try to respect that. So when you see some lines that are unusually short it's because they represent the end of the paragraph and the new line will start a new paragraph and a new concept.

Ein paar Beispielfragen

How can I save my settings (wpm, lines showing, etc)?

We're currently storing those settings in a browser cookie. So for as long as you have cookies enabled in your browser, the last setting used will be automatically applied to your current reading session.

How can I push my reading speed further?

A very easy technique is to set the pace to a faster reading pace that you can actually read and then slowing it down halfway. Let's say you hit a plateau at 400 wpm, you would speed it up to 500 wpm. Read at that speed for a minute or 2, then bring it down to 425-450 wpm. It will actually feel pretty slow.

Are there any plans for desktop applications?

Yes, we have plans to release both desktop and mobile application to aid speed readers. At the current moment we are still in the phase of requirements gathering.
